

MDaemon Console vs. Remote Administration Feature Mappings

This guide maps where to configure key MDAemon Email Server features in the two administrative interfaces: the desktop MDAemon Console (Configuration Session) and the browser-based MDAemon Remote Administration (MDRA / WebAdmin). Paths reflect MDAemon Email Server v26.0. Console breadcrumbs use “»”; MDRA breadcrumbs use “|”.

MDaemon Console (desktop) top-level menus

File · Edit · Setup · Security · Accounts · Queues · Windows · Help

MDaemon Remote Administration (browser) sections

Main · Setup · ActiveSync · Security · Spam Filter · Messages and Queues · Logs · Reports

Note: The Console’s “Web & IM Services” splits into MDRA’s “Webmail Settings” + “Remote Admin Settings.” “Security Manager” (Console) and “Security Settings” (MDRA) refer to the same consolidated dialog. As of v26.0 the “Trusted Hosts” dialog is renamed “Trusted Domains.”

Security

Feature	MDaemon Console (»)	Remote Administration ()	Notes
Dynamic Screening (DoS, dictionary & brute-force; auth-failure blocking)	Security » Dynamic Screening	Security Dynamic Screening	
Location Screening	Security » Security Manager » Screening » Location Screening	Security Screening Location Screening	
IP Screening	Security » Security Manager » Screening » IP Screen	Security Screening IP Screening	
Host Screening	Security » Security Manager » Screening » Host Screen	Security Screening Host Screening	
IP Shielding	Security » Security Manager » Sender Authentication » IP Shield	Security Sender Authentication IP Shield	
Tarpitting	Security » Security Manager » Other » Tarpitting	Security Other Tarpitting	
Greylisting	Security » Security Manager » Other » Greylisting	Security Other Greylisting	
Reverse Lookup	Security » Security Manager » Security Settings » Reverse Lookup	Security Security Settings Reverse Lookup	
SMTP Authentication	Security » Security Manager » Sender Authentication » SMTP Authentication	Security Sender Authentication SMTP Authentication	
SPF (Sender Policy Framework)	Security » Security Manager » Sender Authentication » SPF Verification	Security Sender Authentication SPF Verification	
DKIM signing & verification	Security » Security Manager » Sender Authentication » DKIM Signing/DKIM Verification	Security Sender Authentication DKIM Signing/Settings/Verification	
DMARC	Security » Security Manager » Sender Authentication » DMARC Verification/Reporting/Settings	Security Sender Authentication DMARC Settings/Verification/Reporting	Filtering DMARC failures to spam is on by default on new v26 installs.
ARC (Authenticated Received Chain)	Security » Security Manager » Sender Authentication » ARC Settings	Security Sender Authentication ARC Settings	

Feature	MDaemon Console (»)	Remote Administration ()	Notes
MTA-STTS / RequireTLS	Security » Security Manager » SSL & TLS » SMTP Extensions	Security SSL & TLS SMTP Extensions	
DNSSEC	Security » Security Manager » SSL & TLS DNSSEC	Security SSL & TLS DNSSEC	
SSL / TLS & Let's Encrypt	Security » Security Manager » SSL & TLS (MDaemon / Webmail / Remote Admin / Let's Encrypt)	Security SSL & TLS (also Main Webmail Settings; Main Remote Admin Settings)	Let's Encrypt automation does not support cluster secondary nodes.
Backscatter Protection	Security » Security Manager » Other » Backscatter Protection	Security Other Backscatter Protection	
Sender / Recipient Block Lists	Security » Security Manager » Screening » Sender/Recipient Block List	Security Screening Sender Block List	
Trusted IPs / Trusted Domains (was "Trusted Hosts")	Security » Security Manager » Security Settings » Trusted IPs / Trusted Domains	Security Security Settings Trusted IPs / Trusted Domains	Renamed in v26.0.
Anti-Relaying (Relay Control)	Security » Security Manager » Security Settings » Relay Control	Security Security Settings Relay Control	
Content Filtering	Security » Content Filter	Security Content Filter (Rules, Attachments, Compression)	
DNS Block Lists (DNSBL)	Security » Spam Filter » DNS-BL	Spam Filter DNS-BL	
Detect & Disable Hijacked Accounts	Security » Security Manager » Screening » Hijack Detection	Security Screening Hijack Detection	
Detect Spoofed Email Addresses	Security » Security Manager » Sender Authentication	Security Sender Authentication	
Password Controls / Compromised-Password Check	Accounts » Account Settings » Other » Passwords	Setup Account Settings Passwords	
App Passwords	Accounts » Account Manager » (Account Name) » Account Settings » App Passwords	Main Account Manager (Account Name) App Passwords	
OAuth 2.0 (MultiPOP collection)	Setup » Server Settings » MultiPOP	Setup Server Settings MultiPOP	
Two-Factor Authentication (2FA)	Accounts » Edit Account » (Account Name) » Web Services	Main Account Manager (Account Name) Web Services	
Health Check utility	—	Security Health Check	MDRA-ONLY. Not present in the desktop Console.
WebAuthn, CSRF tokens, Remember-Me, HTTP headers, INI editing	—	Main Remote Admin Settings / Main Webmail Settings	MDRA-ONLY web-interface options.

Anti-Spam / AntiVirus

Feature	MDaemon Console (»)	Remote Administration ()	Notes
Spam Filter (scoring, SpamAssassin 4.0, Bayesian auto-learn, allow/block)	Security » Spam Filter	Spam Filter Filter Settings	
Spam Honeypots	Security » Spam Filter » Spam Honeypots	Spam Filter Spam Honeypots	
Outbreak Protection (Zero-Hour spam & virus / RPD)	Security » Outbreak Protection	Security Outbreak Protection	
MDaemon AntiVirus – inline scanning (IKARUS / ClamAV)	Security » AntiVirus » Virus Scanning	Security AntiVirus	Requires MDaemon AntiVirus license key.
AV Updater / update schedule	Security » AntiVirus » AV Updater; Setup » Event Scheduling » AntiVirus Updates	Security AntiVirus AV Updater	
AntiSpam daemon (MD-SpamD)	Security » Spam Filter » Spam Daemon (MDSpamD)	Spam Filter Filter Settings Spam Daemon (MDSpamD)	

Feature	MDaemon Console (»)	Remote Administration ()	Notes
Groupware & Collaboration			
ActiveSync – enable / global	Setup » ActiveSync	ActiveSync	
ActiveSync – domain settings	Setup » ActiveSync » Domains	ActiveSync Domain Management	
ActiveSync – policies / Mobile Device Management	Setup » ActiveSync » Policy Manager	ActiveSync Policy Manager	
ActiveSync – remote wipe	Setup » ActiveSync » Clients (right-click client)	ActiveSync Client Management (select client)	
Public Folder Manager	Setup » Public Folder Manager	Setup Public Folders Public Folder Manager	
Public & Shared Folder global settings	Setup » Server Settings » Public & Shared Folders	Setup Public Folders Public & Shared Folders	
Shared Folders (per account) + ACLs	Accounts » Account Manager » [account] » Shared Folders	Main Account Manager [account] Shared Folders	
CalDAV / CardDAV	Setup » Web & IM Services » CalDAV & CardDAV	Setup CalDAV & CardDAV	
MDaemon Connector for Outlook	Setup » MDAemon Connector	Main MDAemon Connector	
Calendar Free / Busy	Setup » Web & IM Services » Webmail » Calendar	Main Webmail Settings Calendar	
Contact Synchronization	Setup » Server Settings » Public & Shared Folders	Setup Public Folders Public & Shared Folders	
XMPP server / MDAemon Instant Messenger	Setup » Web & IM Services » XMPP	Setup XMPP Server	
Domains (Domain Manager)	Setup » Domain Manager	Main Domain Manager	
Mailing Lists (List Manager)	Setup » Mailing List Manager	Main Mailing List Manager	
Custom Branding (Webmail / Remote Admin)	—	Main Webmail Settings Branding; Main Remote Admin Settings	MDRA-ONLY. Not present in the desktop Console.
Clustering / cluster configuration	Setup » Cluster Service	—	CONSOLE-ONLY. MDRA is not cluster-aware; route MDRA to the primary node.
Log Settings / logging	Setup » Server Settings » Logging	Logs Log Settings	
Gateways / Gateway Manager (backup MX, forwarding)	Setup » Gateway Manager	Main Gateway Manager	
Signatures (default / domain)	Setup » Server Settings » Signatures; Setup » Domain Manager » [domain] » Signatures	Setup Server Settings Default Signature; Main Domain Manager (Domain) Signatures	
Client Signatures (push to Webmail / Outlook)	Setup » Server Settings » Signatures » Default Client Signatures	Setup Server Settings Default Client Signature; Domain Manager (Domain) Client Signatures	
Queue Management	Queues tab / Queue & Statistics Manager	Messages and Queues	
Event Scheduling (mail delivery; AV/AS updates)	Setup » Event Scheduling	Main Remote Mail Delivery Schedule; Security AntiVirus AV Updater	
LDAP / Active Directory	Accounts » Account Settings » Active Directory	Setup Active Directory	
Archiving	Setup » Server Settings » Archiving	Setup Server Settings Archiving	
Message Indexing	Setup » Message Indexing	Messages and Queues Message Indexing
